STEINEL announces the launch of its STEINEL Lite™ HG 350 ESD. This sleek, ergonomically optimized tool incorporates cutting edge STEINEL technology to meet the exacting needs of even the most sensitive applications. Innovative features include a bright LED light to illuminate the work area while highly focused hot air ensures an accurate result.

The STEINEL HG 350 ESD offers targeted 3.5 CFM airflow and temperature up to 930°F, suited for precision work. This ESD safe heat gun is perfect for the electronics industry and small profile heat shrink tubing. An integrated LED light illuminates work area and acts as an "on" indicator light enhancing safety and precision. Red "hot" indicator warns user not to touch until nozzle has cooled. The HG 350 offers a lightweight well balanced design to reduce fatigue during long term use. The versatility of the heat tool is enhanced by a variety of available accessories including a 7mm Reducer, Reducer with Reflector Guard, 40mm Reflector, and Precision Reflector. John Ireland, President of Steinel America Inc., proudly states "STEINEL is always on the cutting edge of technology. The HG 350 ESD is filling a need long asked for by the industry."

For years industry professionals have looked to STEINEL for the newest and most durable technology available in heat tools. STEINEL offers a full line of heat tools that currently includes: heat guns, torches, soldering irons and glue guns.
