CONTROLS**

## Our digital lighting control family

PS WL DCS

IR Quattro HD DCS

IS 345 DCS

STEINEL is proud to offer a wide variety of DCS sensors allowing for accurate and reliable performance for a wide range of applications.

STEINEL offers DCS sensors for every application including wall switches, high bay-capable sensors, low profile sensors, hallway presence detectors, and IP-rated products with water resistance and a wide operating temperature range.

## DCS Connect

Take your sensors even further with our feature-packed digital controller, DCS Connect. Easily integrate sensors, switches and more with BACnet and Bluetooth Mesh capabilities.

DCS Connect works perfectly with COEUS, allowing for deeper control and insight.
